ABOUT PRINTCRETE

Printcrete Inc. is owned and operated by Dan Spinks, who has been installing quality decorative stamped concrete in the Barrie area since 1990 and has over 30 years experience in the concrete industry. Dan is "hands on" and oversees all of our projects.

Printcrete's decorative stamped concrete is perfect for pool decks, patios, sidewalks and driveways.

Decorative stamped concrete is durable and performs well in our tough Canadian winters.

At Printcrete, we offer an exceptional service and have the experience to custom design and install a high quality product. Let us help you select the right design, pattern and colour that will compliment your surroundings.

WHY DECORATIVE STAMPED CONCRETE?

- Long Lasting Beauty
- Suited for Residential or Commercial Settings
- Low Maintenance
- Neat and Clean
- Rich Appearance That Increases Property Values

HOW DOES IT WORK?

Unlike traditional pavers and interlocking brick which tend to sink, shift and grow weeds, stamped concrete is poured in place and stamped with a pattern to imitate bricks, natural stone or slate.

By adding colour we can achieve a very natural looking product. Reinforced with 1/2" rebar our product will not shift and sink. Sealing the concrete will enhance the colours and help protect it from stains, colour fading and damage by road salts.

Our natural slate/stone patterns and custom colours provide an elegant finish.

APPLICATIONS

Include the elegance and class of decorative concrete in your landscaping plans:

SIDEWALKS
POOL DECKS
STEPS
DRIVEWAYS
PATIOS
OUTDOOR AREAS
INDOOR AREAS

*Ask about radiant heat
and ice melt systems!*
